

Tolco Corporation Komodo™ Urinal Mat

A different breed of Urinal Mat

Toledo, Ohio (**August 1, 2019**) – Tolco Corporation, a leading manufacturer of innovative product solutions for the Janitorial, Industrial, Food Service, Automotive, Beauty & Barber, Animal Health, and Safety markets, has introduced a revolutionary new urinal mat.

Tolco's Komodo Mat offers superior performance and user benefits. Komodo Urinal Mats offer packaging that is approximately 50% smaller and lighter than competitor's packaging. This allows for space saving in the warehouse, on the delivery vehicle, and in the supply closet. This also allows for more economical shipping whether shipping via truck or courier.

Designed to be better by eliminating what is unnecessary and enhancing essential components.

	Competitors' Urinal Mats	Komodo Urinal Mats
Frame	Heavy plastic or rubber	No frame design reduces weight and provides cleaner appearance
Floor Adhesion	Use small adhesive strips or hook and loop fasteners to secure mat to floor	Uses a full adhesive back that securely holds it in place and peels away cleanly when it is time to dispose.
Mopping	Can not be mopped over. Must be removed for proper mopping	Can be mopped over. Any disinfectants or deodorizers in the mop water will disinfect and deodorize the Komodo mat
Wicking	Absorb liquids and trap them like a diaper	Wick liquids to the surface allowing them to evaporate
Disposal	Too large for disposal in traditional waste bins or maid's carts. Typically carried through the facility to be disposed of in the dumpster.	Easily crumple into a small ball that can be disposed of in any waste bin or maid's cart.
